

APPLICANT: VIZIO

EQUIPMENT: Bluetooth Stereo Headphone

BRAND NAME : VIZIO

MODEL NAME : VHB100

FCC ID : YLY-VHB100

FILING TYPE : Certification

STANDARD : OET Bulletin 65 Supplement C (Edition 01-01)

We, SPORTON INTERNATIONAL INC., would like to declare that the tested sample has been evaluated in accordance with FCC OET Bulletin 65 Supplement C (Edition 01-01).

The test results in this report apply exclusively to the tested model / sample. Without written approval of SPORTON INTERNATIONAL INC., the test report shall not be reproduced except in full.

1. Introduction

The report has been prepared on behalf of VIZIO Bluetooth Stereo Headphone to show compliance

with the RF Exposure.

Requirements

Three different categories of transmitters are defined by the FCC in OET Bulletin 65. These categories

are fixed installation, mobile and portable and are defined as follows:

• Fixed installation:

Fixed location means that the device, including its antenna, is physically secured at a permanent

location and is not able to be easily moved to another location. Additionally, distance to humans form

the antenna is maintained to at least 2 meters.

Mobile Devices:

A mobile device is defined as a transmitting device designed to be used in other than fixed locations

and to be generally used in such a way that a separation distance of at least 20 centimeters is normally

maintained between the transmitter's radiating structures and the body of the user or nearby persons.

Transmitters designed to be used by consumers or workers that can be easily re-located, such as a

wireless modem operating in a laptop computer, are considered mobile devices if they meet the 20

centimeter separation requirement. The FCC rules for evaluating mobile devices for RF compliance are

found in 47 CFR 2.1091.

Portable Devices:

A portable device is defined as a transmitting device designed to be used so that the radiating

structure(s) of the device is/are within 20 centimeters of the body of the user. Portable device

requirements are found in Section 2.1093 of the FCC's Rules (47 CFR 2.1093)

For this test report the VIZIO VHB100 is being done as a portable device.

Page Number : 4 of 8

Report Issued Date: Aug. 06, 2010

Report No. : FA061724

The FCC also categorizes the use of the device as based upon the user's awareness and ability to

exercise control over his or her exposure. The two categories defined are Occupational/Controlled

Exposure and General Population/Uncontrolled Exposure. These two categories are defined as

follows:

Occupational/controlled Exposure:

In general, occupational/controlled exposure limits are applicable to situation in which persons are

exposed as a consequence of their employment, who have been made fully aware of the potential for

exposure. Awareness of the potential for RF exposure in a workplace or similar environment can be

provided through specific training as part of a RF safety program. If appropriate, warning signs and

labels can also be used to establish such awareness by providing prominent information on the risk of

potential exposure and instructions on methods to minimize such exposure risks.

General Population/Uncontrolled Exposure:

The general population / uncontrolled exposure limits are applicable to situations in which the general

public may be exposed or in which persons who are exposed as a consequence of their employment

may not be made fully aware of the potential for exposure or cannot exercise control over their

exposure. Members of the general public would come under this category when exposure is not

employment-related; for example, in the case of a wireless transmitter that exposes persons in its

vicinity. Warning labels placed on low-power consumer devices such as cellular telephones are not

considered sufficient to allow the device to be considered under the occupational/controlled category,

and the general population/uncontrolled exposure limits apply to these devices.

Since there are no warnings or training associated with this unit and it can be used by anyone,

Bluetooth Stereo Headphone is evaluated to the General Population / Uncontrolled Exposure limits.

Report No. : FA061724

2. Administration Data

2.1 Testing Laboratory

Test Site	SPORTON INTERNATIONAL INC.	
	No. 52, Hwa Ya 1 st Rd., Hwa Ya Technology Park,	
Test Site Location	Kwei-Shan Hsiang, Tao Yuan Hsien, Taiwan, R.O.C.	
rest Site Location	TEL: +886-3-327-3456	
	FAX: +886-3-328-4978	

2.2 Applicant

Company Name	VIZIO
Address	39 Tesla Irvine, CA 92618

2.3 Manufacturer

Company Name	Merry Electronics (Shenzhen) CO., LTD.			
	No. 50, MeiBao Road, Dalang Street, BaoAn District, Shenzhen City, GuangDong Province, China			

SPORTON INTERNATIONAL INC.

TEL: 886-3-327-3456 FAX: 886-3-328-4978 FCC ID: YLY-VHB100 Page Number : 6 of 8
Report Issued Date : Aug. 06, 2010

Report No. : FA061724

3. General Information

3.1 <u>Description of Device Under Test (DUT)</u>

Product Feature & Specification			
DUT Type	Bluetooth Stereo Headphone		
Brand Name	VIZIO		
Model Name	VHB100		
FCC ID	YLY-VHB100		
Tx Frequency	2400 MHz ~ 2483.5 MHz		
Rx Frequency	2400 MHz ~ 2483.5 MHz		
Antenna Type	Chip Antenna		
HW Version	Mainboard V4; Secondary Board V3		
SW Version	BHC_201_RC20100604-01		
	Bluetooth (1Mbps) : GFSK		
Type of Modulation	Bluetooth EDR (2Mbps): π /4-DQPSK		
	Bluetooth EDR (3Mbps): 8-DPSK		
DUT Stage	Production Unit		

List of Accessory:

Specification of Accessory			
	Brand Name	Phihong	
AC Adapter	Model Name	PSM03A-050Q	
AC Adapter	Power Rating	I/P:100-240Vac, 50-60Hz, 100mA; 6-8VA	
		O/P: 5Vdc, 550mA	
Battery	Brand Name	Danionics	
USB Cable	Signal Line Type	1.0 meter shielded cable without ferrite core	
Audio Cable	Signal Line Type	1.0 meter non-shielded cable without ferrite core	

Remark: The above DUT's information was declared by manufacturer. Please refer to the specifications or user's manual for more detailed description.

Report No.: FA061724

4. RF Exposure Evaluation

4.1 Radio Frequency Radiation Exposure Evaluation

For this device, the calculation is as follows:

➤ No evaluation required if power is below this power threshold:

Frequency	Power	Power	
(GHz)	(mW)	(dBm)	
2.48	24.19	13.84	

Maximum measured transmitter power for the EUT:

Power	
(dBm)	
1.62	

Threshold for no RF exposure evaluation is 13.84 dBm.

Transmitter power of this device is 1.62 dBm.

Conclusion: No RF exposure evaluation required since transmitter output power is below the power threshold.
